Our Field Seed Corn is of the highest type and carefully hand selected from the field before the other corn is ready to crib. It is hung on hangers suspended from the ceiling of our seed corn house and thoroughly dried by air circulation.

Each individual ear is carefully examined when taken down to be shelled. It is then tipped and butted and graded over our special corn screens. Prize ears can be grown from our corn and we suggest you order early as high grade seed corn is scarce this year.

## TELEGRAPHIC CIPHER OR CABLE CODE FOR WEIGHTS

The Telegraphic word for weights should always precede the cipher word for seeds. Please tell us in first word of telegram, how shipment is to be made "MAIL, EXPRESS or FREIGHT"—thus "MAIL DACE CALM DAD CAMP," would read—"Mail at once three pounds Early Jersey Wakefield Cabbage Four pounds Large Late Drumhead Cabbage." "EXPRESS DAINTY LABAN FREIGHT DECOY BALL," would mean "Express at once ten pounds Early Curled Simpson Lettuce Freight Six Hundred pounds Burpee's Stringless Green Pod Beans."

Our customers will find this an inexpensive and quick way to secure seeds, when in a hurry. We cannot, however, hold ourselves responsible for any errors arising from incomplete messages or incorrect translation.

IMPORTANT. This telegraphic cipher must be used **ONLY** on orders by telegraph or cable and never in written words sent by mail.
